WEBINTELLIGENCE (WEBI)

- Webi Problem
 - Export to Excel truncates data in the Webi report exceeds 65k rows
 - Furthermore, when the report contains multiple tabs it is only saved as one worksheet as opposed to multiple worksheets within the Excel file.

- Excel Limitation
 - Excel cannot hold more 65536 records. This is a known Excel limitation.

- Webi2Excel utility to help
 - Overcome the Excel limitation by downloading into multiple Excel sheets in a workbook.

Rename
The Tab

Rename
The Tab

- Go to **Document > Save to my computer as > Excel (Multiple Sheets)**

The screenshot shows a software window titled '65kplus report'. The 'Document' menu is open, and the 'Save to my computer as' option is selected, opening a sub-menu. In this sub-menu, 'Excel (Multiple Sheets)' is highlighted. A purple callout bubble points to the 'Save to my computer as' option with the text 'Click Here'. A blue callout bubble points to the 'Excel (Multiple Sheets)' option with the text 'Click Excel (Multiple Sheets) Option'. The background shows a file explorer on the left and a data table on the right.

Shop Facts Id	Color Cod			unt Sold	
1	1			298	
2	1			790	
3	189	158	63.6	149	
4	224	158	43.3	135	

After you click on “Excel (Multiple Sheets)”, three options will appear.

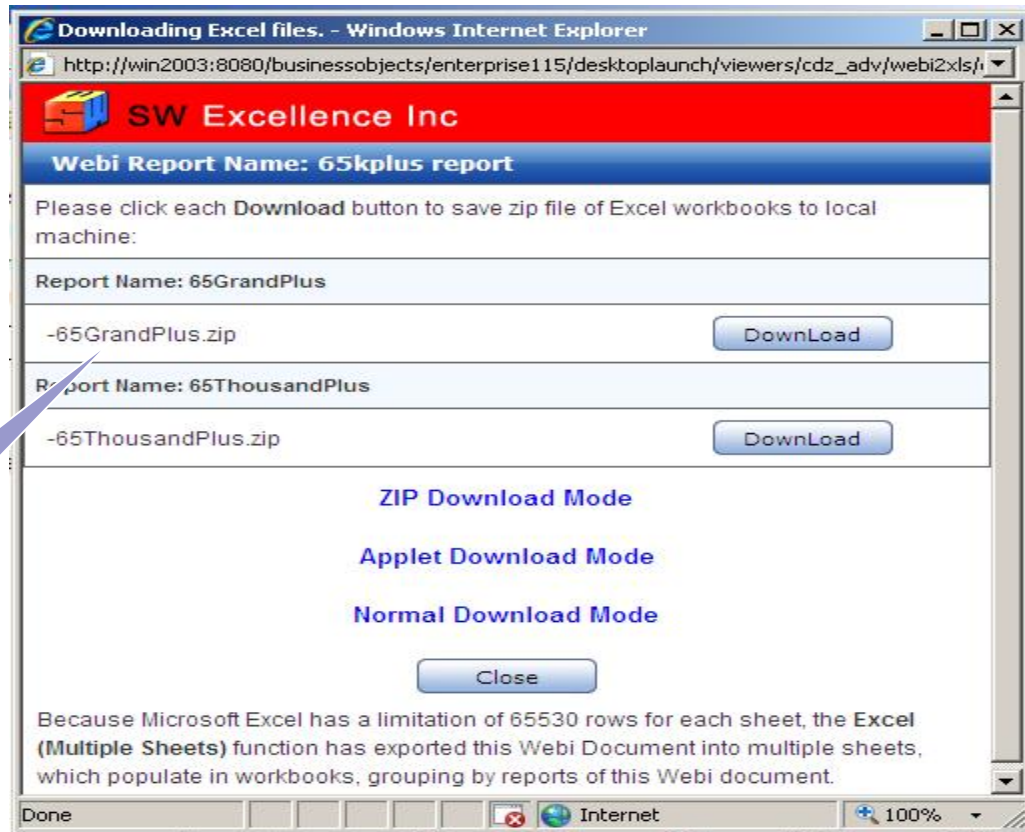

Zip Download Mode: When you download, it will bundle all the Excel files **per Web1 tab** as one Zip file and download to your local hard drive.

Applet Download Mode: When you download in Java Applet mode, you can select to download **multiple Web1 Tabs** at with single click in a Directory.

Normal Download Mode: In this mode you can download individual 65,530 Excel files **per Web1 tab** to your local hard drive

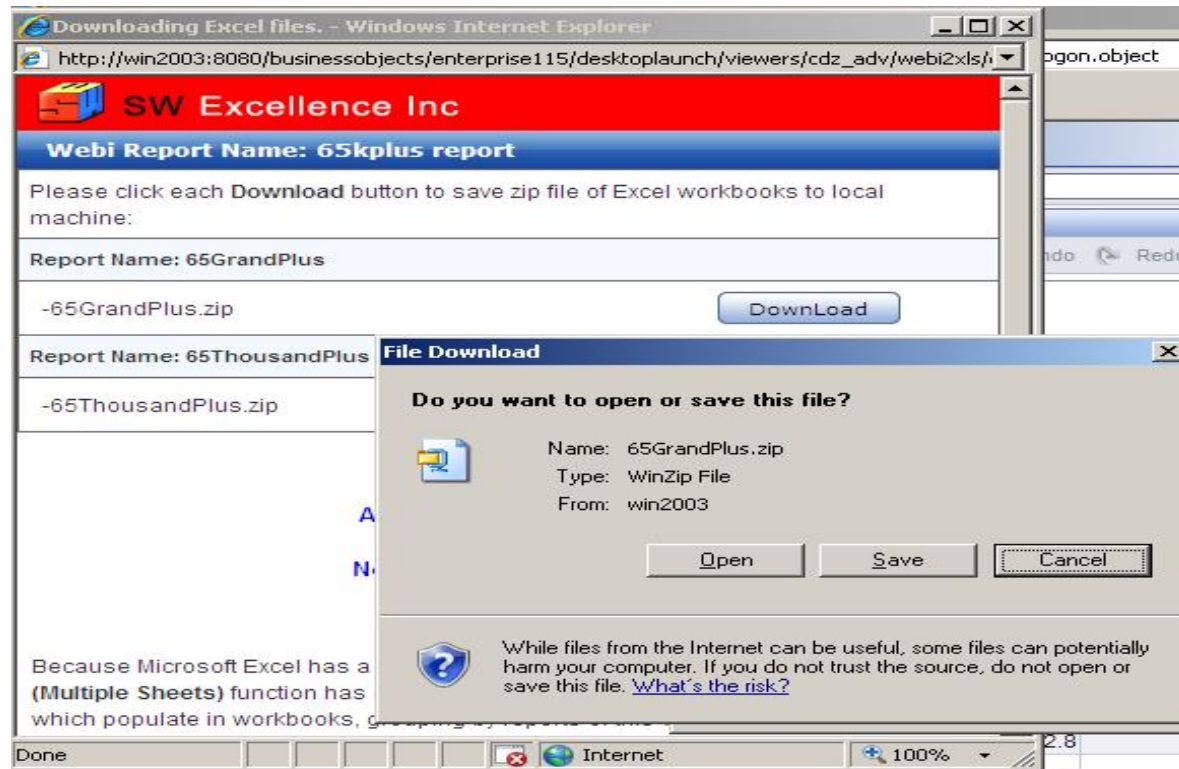

(see the pictures for each mode)

ZIP DOWNLOAD MODE

Each Webi
Tab as
Excel file
Name

Users can Download **each** WebI tab as a **single zip** file. This zip file will contain the record set broken into individual excel file of 65,530 records each. Using this mode, organizations are able to comply with the required **zero footprint** needed in secure locked-down environments.

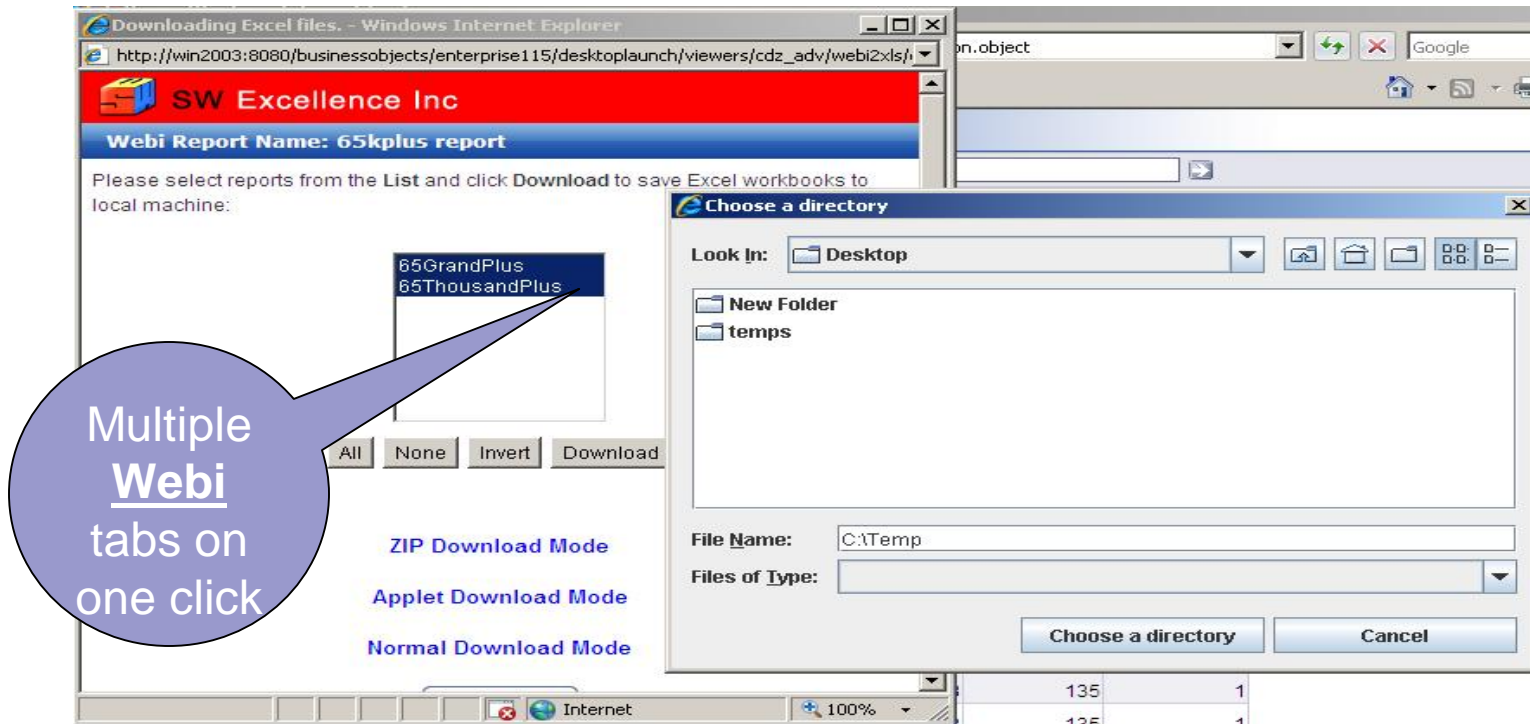

APPLET DOWNLOAD MODE

Users will be prompted to download the Java signed applet to be able to make use of the functionalities.

Users here download, **Group** of Webi tabs or **All** Webi tabs of **individual tab** in a specific directory with a **single click** while the applet behind the scene breaks the record set into excel files of 65,530 records.

NORMAL DOWNLOAD MODE

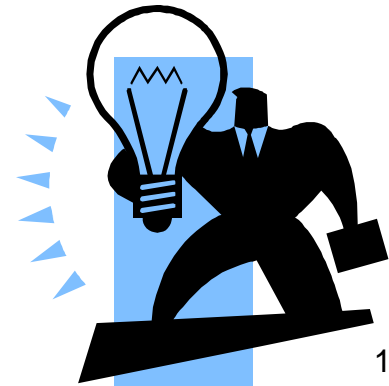

User here can download **each** individual **Excel** files with 65,530 records of the entire record set per Web1 tab. This version also meets the requirement of the locked down environment with **zero footprint**.

Customer collaboration

We understand that there are further opportunities to extend the scope of this utility and as such we have combined with customers to look forward and go beyond. Such collaboration has led to the following enhancements:

- Integration of this utility with Infoview when scheduling WebI Documents
- Broader range of this utility to include BO FC and Crystal reports
- Integration of this utility when in Edit mode with WebI document
- We would love to hear more from the customers on this
